Fitch Upgrades Oman to 'BB+'; Outlook Stable

Fitch Ratings - Hong Kong - 25 Sep 2023: Fitch Ratings has upgraded Oman's Long-Term Foreign-Currency Issuer Default Rating (IDR) to 'BB+' from 'BB'. The Outlook is Stable.

A full list of rating actions is at the end of this rating action commentary.

Key Rating Drivers

Public Finances Underpin Upgrade: The upgrade reflects the use of high oil revenues to pay down debt and spread its maturity, spending restraint reducing external risks, and an increase in Fitch's oil price forecast. We project general government debt to fall to 36% of GDP in 2023 and stabilise at around 35% in 2024 and 2025, below the 'BB' peer median of 54%. This compares with our forecast of 45% of GDP in 2023 when we last upgraded Oman in August 2022.

The upgrade also incorporates our view that the government will not backtrack on recent fiscal consolidation measures. The reduction of Oman's fiscal breakeven price to below USD70/bbl over our forecast horizon from USD80-90/bbl over 2017-19 significantly reduces vulnerability to oil price swings, although risks remain.

Falling Debt: Oman continues to pre-pay some its debt, using the budget surplus from high oil prices. We project debt to decrease by about 8% in nominal value in 2023. The Petroleum Reserve Fund has not been used for these repayments and was over USD2.5 billion in August 2023. Oman's debt management has smoothed its debt profile, reducing the risk of liquidity pressures.

Improving External Balance Sheet: Lower external debt has eased external liquidity risks, although debt repayments prevented accumulation of foreign assets. We project sovereign net foreign assets (Oman Investment Authority's (OIA) foreign assets + FX reserves - direct government debt) to return to a positive position in 2023, after falling to -9% of GDP in 2020, from 53% in 2014. Foreign-exchange reserves will rise only modestly in 2023 as debt repayments continue, to cover 3.3 months of current account payments, below the 'BB' median of 4.3 months.

State-owned entities (SOE) have also contributed to the improvement of Oman's external position, with OQ, Oman Telecommunication Company and Asyad Group significantly reducing debt between end 2021 and June 2023. We project overall SOE debt to be broadly stable at about 40% of GDP, including 17% of GDP in external debt, with Energy Development Oman SAOC increasing its debt to develop its assets while most other large SOE will reduce debt and asset sales will generate internal funding. OIA foreign assets are stable, at close to USD17 billion (15% of GDP). We project total net external debt to stabilise around 26-28% of GDP over 2023-25, well above the 'BB' median but materially lower than the recent past.

Fiscal Restraint Remains: Spending has been relatively prudent in the face of higher oil prices and we project key current spending items to grow in line with nominal GDP, well below the rate in previous periods of high oil prices. The fuel price cap introduced in 2022 is temporary with a clear cutoff price. We project a government budget surplus of 4.1% of GDP in 2023, 2.4% in 2024 and 1% in 2025, narrowing in line with our Brent crude price forecasts of USD80/bbl in 2023, USD75 in 2024 and USD70 in 2025.

We project oil production to plateau from 2025 at 1.08 million bpd and gas production to rise modestly, largely to service domestic demand although new export facilities are being considered. Our fiscal balance metric differs from the government, as we exclude some dividends, liquidity and debt management items from revenue and spending.

Medium-term Fiscal Plan on Hold: High oil prices and global inflationary pressures have led the government to pause some measures included in its medium-term fiscal plan, which was drafted with much lower oil prices assumptions. The authorities are likely to focus on qualitative measures to improve tax collection for VAT rather than raise rates while the budget remains in surplus, but personal income tax could be introduced in 2025. We would expect the tax to initially yield revenues of only 0.2% of GDP.

Budget Risks Remain: Combined with the introduction of VAT in 2021, PIT would provide Oman additional fiscal levers compared with the pre-pandemic period, increasing the resilience of public finances. However, in our view, there remain some uncertainties around Oman's willingness to implement new revenue measures if oil prices dip below our forecasts.

New spending commitments will be introduced, with the authorities passing a law widening the social safety net in July 2023. From 2024, the government will make a higher social security premium contribution, which will increase spending by about 1% of GDP, although this cost will largely be offset by a lower cost of the fuel price cap. Public finances will remain dependent on hydrocarbon revenue and vulnerable to oil prices shocks. Potential social pressure from the low employment rate of young Omanis remains a risk to public finances.

External Vulnerabilities Remain: We forecast sovereign external maturities to average USD2.9 billion in 2024-2026. In addition, annual external debt payments by SOEs under the purview of the OIA average USD3.1 billion in 2024-2025. These external commitments are less burdensome than in recent years, but remain significant, especially in a scenario of lower oil prices and continued tight global financing conditions.

Growth to Slow: We project GDP growth of 2.1% in 2023, slowing from 4.3% in 2022. Oil production will contract as Oman has cut production since May 2023 as part of the OPEC+ cuts, while liquefied natural gas export facilities will be at full capacity. We project non-oil sector growth of 2.7%, as the construction sector starts to recover from a 23% contraction in 2022, the OQ8 Duqm refinery ramps up production and other sectors slow as the pandemic recovery fades. In 2024, the continued rebound in construction, mostly driven by private demand, tourism, downstream hydrocarbons and higher oil production quotas will push GDP growth to 2.7%.

From 2025, Oman could benefit from large scale investments in the green hydrogen sector through projects aimed at using the green energy locally to produce green steel or to export. Investment agreements of over USD20 billion (17 % of 2023 forecast GDP) have been signed, but no final investment decisions have been made and uncertainty about off-takers for export products remains high.

ESG - Governance: Oman has an ESG Relevance Score (RS) of '5[+]' for both Political Stability and Rights and for the Rule of Law, Institutional and Regulatory Quality and Control of Corruption. Theses scores reflect the high weight that the World Bank Governance Indicators (WBGI) have in our proprietary Sovereign Rating Model. Oman has a medium WBGI ranking at the 52nd percentile, reflecting strong scores for rule of law and regulatory quality, but a low score for voice and accountability.

RATING SENSITIVITIES

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/ Downgrade

- Public Finances: An upward trend in government debt/GDP; for example, stemming from a loosening of the fiscal stance, a materialisation of large contingent liabilities or lower-than-expected oil prices.

- External Finances: Deterioration of Oman's external balance sheet; for example, in the form of a decline in central bank reserves and OIA assets.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

- Public Finances: A strengthening in the government's balance sheet; for example, through the introduction of new fiscal consolidation measures or a sustained period of high oil revenue.

- External Finances: A continued decline in net external debt/GDP, reflecting lower SOE external debt or an accumulation of foreign assets.

- Macro: Growth of the non-oil economy that notably improves non-oil fiscal revenues and reducing social spending pressures on the government.

Sovereign Rating Model (SRM) and Qualitative Overlay (QO)

Fitch's proprietary SRM assigns Oman a score equivalent to a rating of 'BBB' on the Long-Term Foreign-Currency (LT FC) IDR scale.

Fitch's sovereign rating committee adjusted the output from the SRM to arrive at the final LT FC IDR by applying its QO, relative to SRM data and output, as follows:

Fitch removed the-1 notch on Structural to reflect its view that the oil prices used in the model no longer cyclically distort its output.

- Public Finances: -1 notch to reflect risks to government finances from high dependence on hydrocarbon revenue and other fiscal rigidities related, for example, to subsidies and wages, and for contingent liabilities.

- External Finances: -1 notch to reflect vulnerability to renewed oil moves that the model may not fully capture and Oman's large net external debtor position, which is well above the 'BB' median

Fitch's SRM is the agency's proprietary multiple regression rating model that employs 18 variables based on three-year centred averages, including one year of forecasts, to produce a score equivalent to a LT FC IDR. Fitch's QO is a forward-looking qualitative framework designed to allow for adjustment to the SRM output to assign the final rating, reflecting factors within our criteria that are not fully quantifiable and/or not fully reflected in the SRM.

Country Ceiling

The Country Ceiling for Oman is 'BBB-',1 notch above the LT FC IDR. This reflects moderate constraints and incentives, relative to the IDR, against capital or exchange controls being imposed that would prevent or significantly impede the private sector from converting local currency into foreign currency and transferring the proceeds to non-resident creditors to service debt payments.

Fitch's Country Ceiling Model produced a starting point uplift of +1 notch above the IDR. Fitch's rating committee did not apply a qualitative adjustment to the model result.

The principal sources of information used in the analysis are described in the Applicable Criteria.

ESG Considerations

Oman has an ESG Relevance Score of '5[+]' for Political Stability and Rights as WBGIs have the highest weight in Fitch's SRM and are therefore highly relevant to the rating and a key rating driver with a high weight. As Oman has a percentile rank above 50 for the respective Governance Indicator, this has a positive impact on the credit profile.

Oman has an ESG Relevance Score of '5[+]' for Rule of Law, Institutional & Regulatory Quality and Control of Corruption, as the WBGIs have the highest weight in Fitch's SRM and are therefore highly relevant to the rating and are a key rating driver with a high weight. As Oman has a percentile rank above 50 for the respective Governance Indicator, this has a positive impact on the credit profile.

Oman has an ESG Relevance Score of '4' for Human Rights and Political Freedoms, as the Voice and Accountability pillar of the WBGIs is relevant to the rating and a rating driver. As Oman has a percentile rank below 50 for the respective Governance Indicator, this has a negative impact on the credit profile.

Oman has an ESG Relevance Score of '4[+]' for Creditor Rights, as willingness to service and repay debt is relevant to the rating and is a rating driver for Oman, as for all sovereigns. Oman has a 20-plus year record without a restructuring of public debt. This is captured in our SRM variable and has a positive impact on the credit profile.

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. DISCLAIMER & DISCLOSURES

FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third- party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Fitch also provides information on best-case rating upgrade scenarios and worst-case rating downgrade scenarios (defined as the 99th percentile of rating transitions, measured in each direction) for international credit ratings, based on historical performance. A simple average across asset classes presents best-case upgrades of 4 notches and worst-case downgrades of 8 notches at the 99th percentile. Sector-specific best- and worst-case scenario credit ratings are listed in more detail at https://www.fitchratings.com/site/re/10238496

The information in this report is provided “as is” without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US$1,000 to US$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US$10,000 to US$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the “NRSRO”). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see https://www.fitchratings.com/site/regulatory), other credit rating subsidiaries are not listed on Form NRSRO (the “non-NRSROs”) and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

dv01, a Fitch Solutions company, and an affiliate of Fitch Ratings, may from time to time serve as loan data agent on certain structured finance transactions rated by Fitch Ratings.

Endorsement policy

Fitch’s international credit ratings produced outside the EU or the UK, as the case may be, are endorsed for use by regulated entities within the EU or the UK, respectively, for regulatory purposes, pursuant to the terms of the EU CRA Regulation or the UK Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019, as the case may be. Fitch's approach to endorsement in the EU and the UK can be found on Fitch's Regulatory Affairs page on Fitch's website. The endorsement status of international credit ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.
